What is the Data Archive?

The UNSW Data Archive is a storage facility for all UNSW researchers (staff and HDR candidates).

The Data Archive provides UNSW researchers a free, safe and secure, large-scale storage service to archive research data.

The store complies with the UNSW Research Code of Conduct and the UNSW Procedure for Handling Research Material & Data by providing a solution that allows researchers to keep full, accurate and legible records of research methods, data and materials in a durable, organised and accessible manner.

The UNSW Data Archive can also be used to store data that is hard to regenerate e.g. computational heavy data or based on a one off event.

Help and further information:

- To learn more about the Data Archive:
    - go to the Start here page
    - see all Help Topics
    - see all Frequently Asked Questions (FAQs)
    - browse through the carousel on the homepage to view all available videos
- To access the Data Archive Web application, use this link, or, go to the Home page for other access options
- To create, or update, a Research Data Management Plan go to the ResToolkit service
- **Note**: the Data Archive service is also available over SFTP, see the SFTP client guide for more information
