

Is data on the Data Archive encrypted?

Data in the UNSW Data Archive is automatically encrypted at rest using AES-256.

This applies even if you separately encrypt some data before uploading it to the Data Archive.

Help and further information:

- To learn more about the Data Archive:
 - go to the Start here page
 - see all <u>Help Topics</u>
 - see all Frequently Asked Questions (FAQs)
 - browse through the carousel on the homepage to view all available videos
- To access the Data Archive Web application, use this <u>link</u>, or, go to the <u>Home</u> page for other access options
- To create, or update, a Research Data Management Plan go to the ResToolkit service
- **Note**: the Data Archive service is also available over SFTP, see the <u>SFTP client guide</u> for more information
