

How should I access the Data Archive?

The UNSW Data Archive [Web application](#) provides access to an interface enabling you to **upload**, **download**, **locate**, and **review** your research data.

The Data Archive [Web application](#) is suitable for researchers who wish to **search** the Data Archive and to either upload or download **less** than 50 gigabytes (GB) of data and/or **less** than 1000 files (during a single session). See the [Web application guide](#) for more information.

Researchers who frequently upload or download data, and/or generate datasets, may wish to schedule a regular upload or download of data rather than manually uploading and downloading data via the [Web application](#).

- Researchers who upload or download **more** than 50 GB of data and/or **more** than 1000 files, at a time, please see the [SFTP client guide](#).
- Researchers who wish to schedule a regular upload or download of data, please see the [Command line script guide](#).

Help and further information:

- To learn more about the Data Archive:
 - go to the [Start here](#) page
 - see all [Help Topics](#)
 - see all [Frequently Asked Questions](#) (FAQs)
 - browse through the carousel on the [homepage](#) to view all available videos
- To access the Data Archive Web application, use this [link](#), or, go to the [Home](#) page for other access options
- To create, or update, a Research Data Management Plan go to the [ResToolkit](#) service
- **Note:** the Data Archive service is also available over SFTP, see the [SFTP client guide](#) for more information
